Minneapolis Moline

KYLE HOOKER from Indiana

A brief history about Minneapolis Moline

Minneapolis Moline was born in 1929 from a merger between Minneapolis Steel and Machinery, Minneapolis Threshing Machine, and Moline Plow Co. The company purchased Avery in 1952 to add smaller tractors to their line. Purchased by White Motor in 1963, the Minneapolis Moline brand name continued until 1974 after which the brand name was discontinued. AGCO acquired White Motor Company in 1991.

Mylar decals

All decals are USA made.

Tips on applying our decals

All decals are mylar unless otherwise noted. Have the pitted area filled, sanded smooth and painted. Paint must be completely dry prior to installation (usually 3 - 4 weeks). Wash area with soap & water (new paint included) on which decal is to be placed.

For mylar decals (film between lettering): Trim to border of design where possible prior to removing white backing paper. Lightly spray the area with window cleaner (do not use window cleaner in aerosol can). Peel white backing paper from decal and place in position. Squeegee window cleaner from under decal beginning in center and working outward. If air bubbles occur, puncture with pin & smooth down. **Please note:** These decals have been printed on a tough mylar film using mylar ink. A pressure sensitive adhesive has been employed on the back of the mylar to insure good adhesion to any clean, hard surface.

For vinyl cut deals (no film between lettering) Special order only: Peel backing paper from decal. The decal will be stuck to the application paper. Align the decal using the design, not the application paper, and firmly press decal into place. Slowly remove the application paper starting at one corner. **Please note:** The colors are fused into the vinyl eliminating stacking. CAUTION: Inspect all decal pieces before applying to tractor.

An operator's manual (reprints only) sometimes referred to as the owner's manual is the manual that came with the tractor. It is the manual that was given to the ultimate consumer by the manufacturer. It can be compared to the manual you receive in the glove box of a new car. This manual gives the owner-operator instructions, shift patterns, capacities (anti-freeze, crankcase, etc.) and adjustment procedures (brakes, clutch, etc). This is a very useful and valuable tool in operating your tractor.
